

SURGE22

A fixed-height bathing system with powered seat transfer, suitable for a wide range of care settings

Combining impressive levels of performance with exceptional value, the SURGE22 is designed to be a cost effective bathing solution suitable for a variety of care environments.

The SURGE22 comes with powered seat traverse to ensure the safe and efficient transfer of bathers in and out of the bath.

With its energy-efficient keyhole design and array of water-saving features, this versatile bathing system is extremely economical to run. Compact enough to fit into the space of a traditional style bath, the SURGE22 has a long internal length and extra-wide seating area so it delivers outstanding levels of comfort.

KEY FEATURES:

- TMV3 water temperature control taps
- Powered seat system (with strap)
- Nursing arms
- SWL = 165kg

OPTIONAL EXTRAS:

- Sensory pack
